PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience transforming ideas into scalable, high-performance products. Specializing in **Next.js, React.js, Node.js, cloud infrastructure (AWS, Docker, CI/CD)** and **AI/LLM integrations**. I bridge design, architecture and engineering to deliver software that businesses love and users trust. Proven track record of leading front-end teams, shipping production-grade SaaS platforms, and building AI-powered applications from concept to deployment.

PROFESSIONAL JOURNEY

Full Stack Software Engineer @ FasTech Systems

 Sukkur, Pakistan (Remote) |  Dec 2022 — Present |  Full-time

Leading end-to-end delivery of web applications and mentoring a front-end engineering team.

Key Achievements:

-  **Team Leadership:** Led front-end development team for **1.5+ years**, ensuring timely project delivery and code quality
 -  **Project Management:** Managed end-to-end execution of web projects using **Next.js** and **React.js**
 -  **Code Quality:** Enforced coding standards through regular **code reviews** for high-quality, maintainable code
 -  **Cross-functional Collaboration:** Translated business requirements into software solutions with product, design, and backend teams
 -  **Architecture:** Contributed to software architecture decisions and strategic product planning
- ✂ **Tech Stack:** Next.js React.js TypeScript Node.js Tailwind CSS PostgreSQL Docker
-

Front End Developer @ Augier.ai (US-based Legal Tech)

 New York, USA (Remote) |  Apr 2023 — Sep 2023 |  Contract

Built front-end experiences for a US-based legal tech company and its AI SaaS products.

Key Achievements:

-  **Legal Tech:** Developed front-end solutions for **Augier.ai**, a US-based legal technology company
 -  **UI Implementation:** Translated design mockups into **responsive, accessible, visually appealing** user interfaces
 -  **UX Enhancement:** Enhanced user experience on legal tech applications through **UI/UX improvements**
 -  **Backend Integration:** Collaborated with backend developers to integrate front-end components efficiently
 -  **Remote Excellence:** Executed strong communication fostering seamless collaboration within international team
- ✂ **Tech Stack:** React.js Next.js TypeScript Tailwind CSS REST APIs
-

System Support Engineer & MERN Stack Developer @ FasTech Systems

📍 Sukkur, Pakistan (Remote) | 🇵🇰 Oct 2022 — Oct 2024 | 📅 Full-time

Provided technical support for distributed teams while shipping MERN stack features.

🏆 Key Achievements:

- 🛡️ **System Reliability:** Provided technical support for hardware/software systems, ensuring minimal downtime
 - 🔍 **Problem Solving:** Diagnosed and resolved issues across **operating systems, networks, and applications**
 - 🌐 **Infrastructure:** Installed, configured and maintained **LAN/Wi-Fi connectivity and IT equipment**
 - ☁️ **Remote Stability:** Maintained system stability for remote development environments across **international projects**
- 🔧 **Tech Stack:** Linux Networking Node.js Express MongoDB React.js

🏢 Banking IT Operations & Finance @ The Bank of Punjab

📍 Multan, Pakistan | 🇵🇰 Jun 2022 — Dec 2022 | 📅 Full-time

Supported banking IT operations and financial workflows with accuracy and system integrity.

🏆 Key Achievements:

- 💻 **IT Support:** Supported IT systems within banking operations — PCs, printers and POS systems
 - 🤝 **Vendor Management:** Coordinated with vendors for **hardware repairs and software license renewals**
 - 📊 **Data Integrity:** Maintained data accuracy and system functionality during **critical financial operations**
 - 💰 **Financial Ops:** Managed annual budgets, reconciled bank accounts and processed vendor payments
- 🔧 **Tech Stack:** IT Support POS Systems MS Office Financial Systems

🎓 EDUCATION & CERTIFICATIONS

📖 Bachelor of Science in Information Technology

University of Education, Lahore | Jun 2018 — Jun 2022 | 3.4 CGPA / 4.0

Thesis: Web development and web scraping with AI bots

Focus: Web Development, Database & Network Design, Software Analysis, UI/UX
